**Quality Manager**

## Following up your kind request

SERV Trayvou (STI), a specialist and leader since more than 80 years in Europe, has designed a range of heavy duty locks to meet the highest safety and reliability standards of any worldwide electrostatic precipitators.

### **SAFETY INTERLOCKING SYSTEMS** *For electrostatic precipitators as a protection against elctrocution*

**Robustness**  
**Good Price**  
**Flexibility**

Mechanical Interlocking system ensures personnel follow a predetermined sequence of operations, using a key transfer system.

By interlocking the power supply and earth switch with the access doors, personnel cannot gain access to the precipitator while the power is on.

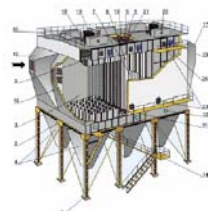

STI can provide a complete consulting service covering every aspect of safety interlocking access control design and manufacture.
