REACH	Certificate available on request
Conflict mineral	Certificate available on request

## OPTIONS

- Marking plate
  - Blue (Standard)
  - Red, Yellow, Green or Orange (Option)
  - Laser marking directly on the stainless steel key

## DISCLAIMER

IMPORTANT:

We must draw your attention to the potential danger of issuing spare, master or submaster keys.

Trapped key interlocks control procedural events in a strict sequence. If this sequence is altered through the use of spare or master keys, the integrity of your safety system may be compromised, possibly resulting in serious or even fatal injury to persons or damage to processes and plant.

In the wrong hands, spare or master keys could expose person(s) to the very hazard from which the interlocking system is intended to protect them.
